

CHAINSAW CHAPS MAX RESIST

Heavy duty Oxford outer fabric with extremely high tear resistance. The internal chain arresting material is FIBREACTIVE CHAINSTOPPER TECHNOLOGY, A mixture of KEVLAR and high tenacity fibres. The chaps have a lightweight breathable lining fabric for comfort. The waist has a wide adjustable belt, with ten adjustable leg buckles and straps. An ankle flap stops debris falling into boots. A fluorescent & reflective safety strip is on each leg.

Colour; Greenstone
 Sizes as leg length: Short, Medium, Long.
 Certified to AS/NSZ 4453.3.1997

CHAINSAW TROUSERS MAX RESIST

Heavy duty Oxford front panels, with high tenacity nylon back panels. The internal chain arresting material is FIBREACTIVE CHAINSTOPPER TECHNOLOGY, A mixture of KEVLAR and high tenacity fibres. The trousers have articulated legs for comfort and ease of movement when tree climbing, and zips at the back of the legs give a smooth profile. Elasticated waist bands add to the comfort for all day wear. All pockets have flaps to avoid entry of sawdust. A fluorescent & reflective safety strip is on each leg.

Colour; Greenstone/Black
 Waist Sizes: 77/82, 87/92, 97/102, 107/112
 Certified to AS/NSZ 4453.3.1997

CHAINSAW CHAPS FIRE RESISTANT

FR ELECTRIC ARC RATED CHAPS/TROUSERS
 The specifications are the same as for the chainsaw chaps/trousers, except that the outer and lining fabric is fire retardant 100% cotton drill with a High Voltage Electric Arc Resistance. A layer of KEVLAR felt protects the FIBREACTIVE CHAINSTOPPER system. Trousers are also available.

Colour; High Vision Orange.
 Sizes as leg length: Short, Medium, Long
 Waist Sizes: 77/82, 87/92, 97/102, 107/112
 Outer & Lining fabric to; AS/NSZ 1906.4.1994 High Vision fabrics AS/NSZ 4824.2006
 Wildlands Fire-fighting
 NFPA 70E, Level 2 Electric Arc

CHAINSAW CHAPS LIFESTYLE

LIFESTYLE CHAINSAW CHAPS
 The Lifestyle chaps have been developed for casual users, in a rural or domestic environment, where a chainsaw is being used occasionally. The chaps have full length zips at the back of the legs for easy access over boots, and a fully adjustable waist belt. Materials and degree of safety is the same as for the PROCHAPS.
 Colour; Greenstone
 Sizes as leg length; Short, Medium, Long.
 Certified to AS/NSZ 4453.3.1997

PRO FOREST ARMOUR

CHAINSAW PROTECTION

Garment Sizing & Certification

Choose the Right Fit: It is important that the correct fit of chainsaw chaps and trousers should be worn. Chaps & trousers should cover the top of the foot. For chaps, measure from your waist to the top of your foot and select the correct size. You should always go longer than shorter. For trousers measure your waist and select the correct waist size, adjust the length of the trousers with braces.

CHAINSAW PROTECTION

FIBREACTIVE TECHNOLOGY

Technically layered, advanced sacrificial protective pad

A blend of woven Kevlar® and interwoven high tenacity technical fibres

Tested and certified to AS/NZS 4453.3.1997

Rapid chainsaw stopping capability

Garment has been designed specifically for improved protection and comfort

Chainsaw chaps and trousers are designed to give protection against accidental injury caused by chainsaws. Users should be aware of the limitations of the protection given, and all normal safety precautions should be taken. Adequate training in the use of all equipment is also recommended.

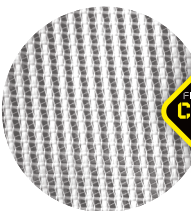

Choose the correct sized garment to give a comfortable fit. The bottom of the protective material should touch the top of the foot. Zips and buckles should be done up at all times.

Garments should be cleaned and inspected regularly. Follow the washing instructions sewn into the garment. Flammable liquids should be washed off as soon as practical. A build up of oil's & petrol's will greatly reduce the fire retardant properties of FR outer fabrics.

Inspect garments daily after use. Any damaged or missing parts should be repaired or replaced immediately. Do not modify the garment in any way. Under no circumstances sew through the layers of fabric. Once cut or damaged the garment should be discarded and replaced.

WARNING. Chainsaws are dangerous if used incorrectly. Best forestry safety practices should be observed at all times. Remember that chainsaw chaps and trousers do not give protection against all risks and injuries. Keep this card in a safe place for future reference.
